PROFESSIONAL PROFILE

Engineering student at Mundiapolis University, specializing in the end-to-end design and development of software applications. Strongly oriented towards architectural modeling (*Clean Architecture*, UML) and rigorous business requirements analysis, I am seeking a graduation internship to transform complex requirements into robust, secure, and scalable Full Stack solutions.

PROFESSIONAL EXPERIENCE

BROKER IMMOBILIER

Full Stack Engineer (Work-Study)

Casablanca, Morocco

Feb. – May 2026

- **Architected and developed** the end-to-end orchestration of a multi-tenant SaaS CRM (Angular + Spring Boot) oriented towards Clean Architecture.
- **Analyzed requirements and modeled** the design of a RAG system for intelligent data querying and automated document synthesis.
- **Secured** the infrastructure by implementing JWT authentication and Role-Based Access Control (RBAC) for enterprise-level security.

HTBS AFRICA

Backend & ERP Engineering Intern

Casablanca, Morocco

Aug. – Oct. 2025

- **Gathered and translated** Moroccan fiscal and cash management regulations into technical specifications to adapt the Dolibarr ERP framework.
- **Designed and deployed** 4 custom PHP/SQL modules to streamline and optimize business workflows.
- **Refactored** database architecture and optimized SQL queries, reducing fiscal report generation time by 40%.

MAJOR TECHNICAL PROJECTS

Modular Architecture & ERP Business Analysis | Python, BPMN

- **Modeled** complex business workflows for perishable goods management using the BPMN standard to align development with logistical constraints.
- **Extended** ERP functionalities by applying the *Open-Closed* principle: created a custom module via inheritance and hooks, without altering the core system.

Distributed Architecture: Banking System | Spring Boot, PostgreSQL

- **Modeled** a decoupled architecture strictly isolating the business core (Core Banking) from client interfaces.
- **Designed** a communication pipeline via an interactive Telegram chatbot and an RBAC-secured portal for banking agents.

devctl – Development Orchestrator | Python, Docker, Shell

- **Specified and implemented** a unified CLI to orchestrate complex local development environments (Spring Boot, Angular), drastically reducing configuration time.

Code Governance & Collaborative Management | Git Workflow, Markdown

- **Led** the alignment of business requirements and enforced a strict branching strategy to prevent merge conflicts in continuous integration.
- **Standardized** team practices by directing the drafting of reference documentation and providing technical mentoring.

TECHNICAL ARSENAL

Analysis & Architecture

UML, BPMN, Clean Architecture, Design Patterns (GoF), REST API.

Backend & Core

Java (Spring Boot, Security), PHP, Python, Node.js.

Frontend

Angular, React.js, TypeScript, Flutter.

Databases

PostgreSQL, MySQL.

DevOps & Cloud

AWS (EC2, S3, RDS), Docker, Git Workflow, CI/CD.

Security & AI

JWT/RBAC, RAG Pipelines, Python AI Libs, Vector DBs.

CERTIFICATIONS

- **AWS Academy:** Cloud Foundations
- **Huawei:** HCIA-Cloud Computing V5.5
- **GitHub:** Foundations (Parts 1 & 2)
- **Cisco:** Data Analytics Essentials (2026)
- **packt :** Advanced Java APIs and Functional Programming

LANGUAGES

French & Arabic: Native

English: Technical / Fluent

METHODOLOGIES

- Agile / Scrum
- Clean & Layered Architecture
- UML & BPMN Modeling
- JWT / RBAC Security
- DevOps & CI/CD Practices

EDUCATION

Software Engineering Degree (Diplôme d'Ingénieur)

2025 – Present

Mundiapolis University, Casablanca

Bachelor's Degree (LST) in Software Engineering

2024 - 2025

FST Errachidia, Morocco
